

REMARKS

In the above-identified Office Action, the Examiner has rejected claims 2-4, 6-14 and 21 as being indefinite. The Examiner stated that claim 21, the sole independent claim herein, is indefinite as it lacks sufficient structure to support the phrase "to create a pumping action". Applicants have amended claim 21 to delete this phrase and also to more accurately define the invention. Further, the Examiner stated that the limitation in claim 12 "said chamber" had insufficient antecedent basis. Applicants replaced this phrase with the phrase "an outlet side of said flow restrictor", and as amended, believe that claim 12 and claim 21 are now acceptable under the strictures of 35 U.S.C. § 112.

The Examiner has indicated that claims 2-4, 6-14 and 21 would be allowable if amended to overcome the rejections under 35 U.S.C. § 112. No new issues are deemed to be raised by this amendment.

Applicants hereby request reconsideration and reexamination thereof.

With the above amendments and remarks, this application is considered ready for allowance and Applicants earnestly solicit an early notice of same. Should the Examiner be of the opinion that a telephone conference would expedite prosecution of the subject application, he is respectfully requested to call the undersigned at the below-listed number.

Respectfully submitted,
